

Segregation

Definition:

The Segregation supply chain model assures that RSPO certified palm oil and its derivatives delivered to the end user comes only from RSPO certified sources. It permits the mixing of RSPO certified palm oil from a variety of sources.

Explanation:

The Segregation supply chain model assures that 100% of the physical product has originated from RSPO certified estates/plantations. However, the physical oil will not be uniquely identified to a specific estate/plantation as in the case of Identity Preserved.

Supply Chain Requirements:

The Segregation approach requires that the RSPO certified palm oil from estates/plantations is kept separate from material from non-RSPO certified estates/plantations at every stage of production, processing, refining and manufacturing throughout the supply chain. This model does allow for the mixing of RSPO certified palm oil and its derivatives from various sources. Therefore the physical oil delivered to the end user will not be fully traceable to the specific mill and its supply base.

Market Claim:

"Contains RSPO Certified Sustainable Palm Oil"

(See for more information RSPO Guidelines on Communication and Claims)

Benefits and Limitations:

Level of traceability: 🍷🍷🍷🍷🍷 Level of claim: 🍷🍷🍷🍷🍷 Implementation costs: \$\$\$\$

- Delivered physical palm oil is 100% RSPO certified palm oil
- Mix of RSPO certified palm oil from a variety of RSPO certified points of origin.
